

Tips for use

Quooker CUBE

Look after me well!

Filtered chilled water

LED ring: solid blue
Push - wait - turn

Filtered sparkling water

LED ring: flashing blue
Push - turn

First use

Before the first use, flush chilled and sparkling water through twice for one minute each time (the tap switches off automatically after one minute). The water in the CUBE takes approximately 40 minutes to cool down after installation, depending on the incoming mains water temperature.

Settings

You can adjust the settings on the display. Navigate through the menu with the left and right arrow keys and confirm your selection with the middle button. You can:

- Change the language
- Set the effervescence level of the water

Daily use

After you have dispensed sparkling water, there will be a short overrun of filtered water, in order to rinse any sparkling residue from the tap.

Replacing the CO₂ cylinder

Once the CO₂ cylinder runs empty, the water flow will become weaker and there will be less carbon dioxide in the water. The CO₂ cylinder then needs to be replaced. When the CO₂ is completely empty, no more water comes out of the tap when you try to dispense sparkling water. You can order a CO₂ refill using your account at quooker.ae

Holiday

If you go on holiday for longer than two weeks, it is cost efficient to switch off your CUBE. You use the display to do this. When you return home, it is important to flush both sparkling & chilled water in the same way as specified under the section 'First use'.

Maintenance

Quooker recommends that you clean the CUBE fan once a year with a brush or vacuum cleaner.

Register your Quooker CUBE

Quooker products come with a two-year warranty. Scan the QR code below or go to quooker.ae/register to register your CUBE. This enables us to help you faster if you have any questions.

Service

If you still have questions after reading this guide, please contact us using the Service Request Form at quooker.ae/request or call +971 (0)4 330 3063.

Serial number Quooker CUBE

Write down the serial number of your CUBE here.
The number is displayed on the front of the CUBE.
