

# THE TAP THAT DOES IT ALL

FILTERED 100°C BOILING, COLD, HOT,  
CHILLED AND SPARKLING WATER

**Quooker®**

# WHAT IS A QUOOKER?

**A Quooker is pure convenience. It provides filtered 100°C boiling, cold, hot and even chilled sparkling water directly from the tap.**

The Quooker system consists of a boiling water-tap on the worktop connected to a small tank in the kitchen cupboard. The water in the Quooker tank is heated to a temperature of 110°C. Consequently it is well boiled. This ensures that all bacteria are removed and it reduces the calcium level which helps, for example, to bring out the taste of tea. When you turn on the tap, the water cools off a bit so that it is still truly boiling

when it flows from the tap (100°C). Alongside a boiling water-tank Quooker has also developed a system for cool filtered and sparkling water: the Quooker CUBE. This is an extra tank that is installed beside the boiling water tank in your kitchen cupboard. The CUBE contains a Hollow Fibre filter that purifies the water. A CO<sub>2</sub> cylinder connected to the CUBE gives you 550 litres of chilled sparkling water.

# WHY A QUOOKER?

## Dutch Quality

It started in 1970 in The Netherlands with a simple yet revolutionary idea by Henri Peteri; boiling water from tap. And his invention is now an indispensable feature of the modern kitchen. Around the world, Quooker users enjoy the convenience of boiling water straight from the tap. And also – since the introduction of the Quooker CUBE – chilled still and sparkling water from the same tap. Our collection consists of various taps in a variety of different finishes. For every kitchen, we have a Quooker to match! To ensure the highest quality all Quooker products are manufactured in our own factory in the Netherlands and come with a 2 year warranty.

## Clean and fresh water

All water dispensed by a Quooker tap is always filtered through NSF approved multistage filters that remove sediment, chlorine, bacteria, pesticides and other contamination which can negatively impact the drinking water. On top of that there is HiTAC active carbon filter in the boiling water tank and a hollow fibre filter in the CUBE to ensure the water is always fresh.

## Help the planet

We all know it's important to be economical with water and yet, so many households unnecessarily waste it both in small amounts – for example when you boil twice as much water as you need – but also in larger amounts, when you let the tap run for a while until the water heats up. With a Quooker you always use the right amount of water and therefore prevent wastage. And you can be even more sustainable by adding a Quooker CUBE to eliminate the use of bottled sparkling water.

## Time saving

With a Quooker you never need to wait for water to boil. It is available instantly, saving you time when you are cooking, making tea and coffee or need to sterilize a baby bottle. And you always have high quality drinking water available so you don't have the hassle of buying water bottles or arranging water delivery at your home.

## Rent your home?

Even when you are renting you can get a Quooker! We will install the Quooker in your kitchen and when you are moving, we can come to reinstall your original mixer tap in your old kitchen and reinstall the Quooker in your new house.

## Safest choice

'Boiling water, straight from the tap. Is that safe?' Actually the Quooker is the safest choice for every household. All Quookers are designed with a number of important safety features, including a childproof handle. The flow of water is delivered as an aerated spray, not a solid jet, preventing the risk of serious scalds or burns. And perhaps most importantly: a Quooker can't fall over, unlike a kettle or a pan.

## Space saving

A Quooker saves precious space on your worktop. The space occupied by a kettle can be freed up to slice, knead and chop. And, you can also finally get rid of that ugly water dispenser! The boiling water tank is compact and doesn't take up much space, so there's still usable space under your worktop or in your kitchen cupboard.

# QUOOKER AUGMENTED REALITY APP

The Quooker augmented reality app allows you to virtually place the tap of your choice in your own kitchen in a fun and easy way. This way you can instantly visualize how any Quooker tap will look and fit in your kitchen! It's easy, simply download the AR app by scanning the QR code below or searching for it in the App-store or Play-store. Open the app and choose the tap you wish to see from the menu. Point your camera at the marker below and the tap will appear.

Scan, to download  
the app.

Or find online.

Open the app  
and scan the marker.
